

AMAR SYLL

Full Stack Developer | PHP Symfony & React

Desio (MB), Lombardy, Italy | amar91syll@gmail.com | +39 388 403 5746

Portfolio: amarsyll.pro | Blog: blog.amarsyll.pro

PROFESSIONAL SUMMARY

Full Stack Developer with experience building and deploying web applications using PHP, Symfony, React, JavaScript, HTML5, CSS3, MySQL and REST APIs. I have designed and built complete applications, including a timesheet management system with authentication, role management, approval workflow and reporting. Focused on end-to-end delivery: requirements analysis, backend and frontend development, API integration, testing, deployment and maintenance. I am looking for a Full Stack PHP Symfony React Developer or PHP Backend Developer position at a company in Milan, in Lombardy or fully remote in Italy.

TECHNICAL SKILLS

Backend: PHP 8, Symfony 8, Twig, REST APIs, Doctrine ORM, MVC, authentication and authorization, web security, data validation, session management.

Frontend: React, JavaScript ES6+, HTML5, CSS3, responsive web design, REST API integration, reusable components, UI/UX.

Database: MySQL, relational database design, SQL queries, Doctrine ORM, migrations.

Tools and methodologies: Git, GitHub, Composer, npm, VS Code, deployment, debugging, Agile/Scrum.

Other skills: online payment integration, web project management, technical documentation, problem solving, independent and collaborative work.

PROFESSIONAL EXPERIENCE

Founder and Full Stack Developer — Baccalauréat SN

February 2025 – October 2026 | Independent project, now closed; code available on my portfolio

- Designed and developed a web education platform for baccalaureate exam preparation, with learning content, user management and access to resources.
- Built the backend with PHP/Symfony (data structure, APIs, authentication, content management) and responsive React interfaces optimized for desktop and mobile.
- Integrated online payments for access to premium services; over 1,700 registered users while the platform was live, with entirely organic (SEO) growth.
- Handled deployment, maintenance, bug fixing and continuous improvement of the application.

Web Developer — Freelance and Personal Projects (VAT-registered, P.IVA)

2026 – Present | Remote

- Built responsive websites and web applications for clients and personal projects, using PHP, Symfony, React, JavaScript, MySQL and REST APIs.
- Managed the full development cycle, from requirements analysis to deployment and maintenance on a self-managed Ubuntu VPS, improving performance, security and UX.

Full Stack Developer — Veille IA (tech and AI watch platform)

September 2026 – Present | Personal project, live at veille-ia.amarsyll.pro

- Developed and deployed a tech and AI watch platform in native PHP 8 with a custom MVC architecture (no framework), MySQL 8 and Tailwind CSS.
- Features: collection of tech news from RSS feeds, publication search and personal notes; deployment and maintenance on a VPS.

Service Desk Operator (Application Support L1/L2) — Horsa Digital Retail S.r.l.

May 2023 – Present | Milan

- First- and second-level IT support for the retail network: Horizon POS system, fiscal printers, scanners, LAN, and user and role management on the WMS.
- Daily ticket handling with OTRS and ServiceNow: intake, classification, diagnosis, escalation and carrier coordination.
- Designed and developed an internal helpdesk/timesheet application with Symfony 8 and React, in production: recording of hours, location, service and activity type.
- Implemented an approval and validation workflow with distinct roles (employees, managers, administrators), secure REST APIs and reporting with data export.
- Designed the relational database with Doctrine ORM migrations.

EDUCATION

Professional Title Web and Web Mobile Developer (DWM) — RNCP Level 5

Educatel (Montrouge, France) — online training with final exam and jury assessment

Master's degree in Physics-Chemistry — Université Cheikh Anta Diop (UCAD), Dakar
